DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 01/23/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of application 10/817,700 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Huang et al. (US 5,436,093).

Regarding claims 29-30, Huang et al. disclose a method of manufacturing an electrode, comprising the steps of mixing dry carbon and dry binder particles, and forming a self-supporting film from the dry particles without the use of any processing additives (column 11, lines 23-31).

Allowable Subject Matter

4. Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-28, the prior art alone or in combination does not teach the limitation of a process for manufacturing an electrode for use in an energy storage device product, the process comprising the steps of:

- supplying dry carbon particles;
- supplying dry binder;
- dry mixing the dry carbon particles any dry binder; and
- dry fibrillizing the dry binder to create a matrix within which to support the dry carbon particles as a dry material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation Relevant of Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Klein (US 5,393,617) discloses bipolar electrochemical battery of stacked wafer cells.
